# +Michelle Krejci

Engineer

[michelle@craychee.io](mailto:michelle@craychee.io)

---

## Profile

DevOps competent, not yet proficient. Interested in being exhausted each day from thinking too hard.

---

## Skills

### DevOps

Provide means to define and build version controlled, distributable, production-analogous virtual environments. Create a replicable, explicit deployment strategy that deploys each sprint.

### Behavior Driven Development

Define the system requirements up front, make acceptance criteria executable and the domain language ubiquitous with tools like behat or phpspec.

### Project Lead

Lead development team through defining and building functionality with behavior driven development that defines a feature's completion and ensure that the code satisfies it without regression.

---

## Technical

PHP

---

git

---

Vagrant

---

Composer

---

Behat

---

Ansible

---

Symfony

---

Scripting

---

Debian/Ubuntu

---

## Experience

# Palantir.net

*Engineer*

## **2014-current**

Acting as Team Lead since October 2014. Instrumental in creating a modern-workflow for the company leveraging Ansible, Packer, Vagrant, Composer, Behat, and Travis CI.

---

# Promet Source

*Developer*

## **2012-2014**

Mentored by and mentee of passionate, hard-working technical and non-technical Drupal professionals. Moved from support, to development, to solutions architect over two years. Participated in updating the development process to incorporate modern, software development best practices

---

# Talks

## MidCamp / Twin Cities Camp 2015

*On PhpSpec and Not the Drupal Way*

An explanation of behavior driven unit testing.

## NICE Camp

*Production is an Artifact of Development*

A walk through my development workflow that conceptualizes production as a product of development, and thus a separate repository, deployable on a successful merge to master.

## Higher Ed Web 2014

*Continuous Integration Training*

A tech-agnostic training aimed as an introduction of CI from source management, to configuration management, to deployment, and behavior-driven testing.

---

# Education

## University of Sheffield

*Doctorate of Philosophy*

## **2007-2012**

Graduate of University of Sheffield, UK. Work as an adjunct professor and editorial assistant formed the basis of a keen interest in creating tools for content creators

---
