Profile

Slayer of technical debt and champion of behavior-driven development. Excels at data migration and configuration management. Motivated to tackle ever-more complex problems and grow beyond Drupal.

Skills

Drupal Development
Builds out functionality with test-driven development that defines a feature's completion and ensure that the code satisfies it without regression

Migration
Migrates data sets in Drupal to Drupal, CSV, XML, and SQL ranging in complexity from several dozen rows to nearly one million

Continuous Integration
Implements, refines, and presents on a variety of tools and strategies aimed at injecting QA into the whole of the development process

Technical

PHP

GIT

Vagrant

Composer

Behat

Chef

Javascript

OS X

Linux

Experience

Promet Source
Developer

2012-2014

Mentored by and mentee of passionate, hard-working technical and non-technical Drupal professionals. Moved from support, to development, to solutions architect over two years. Participated in updating the development process to incorporate modern, software development best practices

Talks

Drupal Con 2013
Making Support Fun and Profitable

explained the audit process as part of a presentation team in association with Pantheon and Chapter Three

MidCamp 2014 / Drupal Camp Chicago 2014
DIY Continuous Integration

a Drupal-specific presentation aimed as an introduction of CI from source management, to configuration management, to deployment, and behavior-driven testing

Higher Ed Web 2013
Continuous Integration: What and Why

a platform-agnostic introduction to CI for higher education tech professionals

Education

University of Sheffield
Doctorate of Philosophy

2007-2012

Graduate of University of Sheffield, UK. Work as an adjunct professor and editorial assistant formed the basis of a keen interest in creating tools for content creators
